

# OCEANOGRAPHY PROJECT

For your oceanography project, you will be choosing an ocean creature (plant or animal) and writing a 3-5 paragraph informational essay on it. In addition, this project will require you to create a realistic, life size depiction of your chosen creature. The teacher must approve the creature, and students in the same homeroom may not choose the same creature. In order to challenge yourself, please try to choose a plant or animal that is unfamiliar to you.
